

Balancing benefits and harms of antipsychotic therapy

Accoras (Brisbane South Division) in partnership with NPS, is offering a program on the **safe and effective use of antipsychotic therapy in schizophrenia, bipolar disorder & behavioural and psychological symptoms of dementia.**

This program provides a valuable opportunity to discuss up-to-date, independent, practical, evidence-based information on current therapeutic issues with a highly skilled NPS facilitator and other general practitioners.

This program will focus on:

- **Keeping your patients well** whilst on antipsychotics
- Increasing understanding of **antipsychotics and side effects**
- **Tips that enable patient compliance and prevent relapse**
- **Resources** to help you and your patients manage their disease

What's in it for me?

- An opportunity to discuss evidence-based information and access key resources
- Time-efficient education with the NPS facilitator
- A Quality Prescribing Initiative (QPI) activity within the Practice Incentives Program and eligible for RACGP QA & CPD and/or ACRRM program points

To participate please provide your details:

Name: _____ Practice name: _____

Preferred Time: _____ Day: _____

Phone No.: _____
