

KISS GUIDE TO VACCINE MANAGEMENT

Immunisation incentives business case studies

February 2007

Immunisation Incentive Payments

GPs and practices/clinics are eligible for the following three immunisation payments for administering age appropriate vaccines against the National Immunisation Program Schedule:

(1) ACIR Notification Payment

- Vaccine Service Providers receive a Notification Payment for providing immunisation information.
- The amount is agreed between each State and Territory Health Departments and the Commonwealth Government: Department of Health and Ageing.
- In Queensland, Vaccine Service Providers receive up to \$3.00 for each immunisation encounter that completes an age appropriate schedule.
- A further \$3.00 per encounter is provided to Queensland Health for administrative support, e.g. the VIVAS database.

(2) Service Incentive Payment (SIP)

- Only those GPs who are registered with the Australian Childhood Immunisation Register (ACIR) as Vaccine Service Providers are eligible to receive SIP.
- Their eligibility is an automatic process and does not require registration. This payment is paid monthly along with the ACIR Notification Payment.
- The SIP is an \$18.50 payment to individual GPs and other Medical Practitioners who notify the ACIR of a vaccination that completes an age appropriate immunisation schedule. The payment is made monthly in addition to the ACIR notification payment.
- SIP payments commenced July 1998.

(3) Outcome Payments

- This payment is only received if the practice/clinic is registered with the General Practice Immunisation Incentive (GPII) Program. If the practice/clinic is registered with the Practice Incentive Program (PIP) or Better Practice Program (BPP), it is automatically registered for the GPII Program.

Keep it Simple and Safe!

KISS GUIDE TO VACCINE MANAGEMENT

- The Outcomes Payment is intended for practices/clinics that have larger numbers of children in their patient populations. Practice/clinic population is determined by virtue of a child attending a practice/clinic for a non-referred Medicare consultation during a 12 month reference period. The GPII scheme has a threshold set at 10 Whole Patient Equivalents (WPEs).
- It is a tiered series of payments to registered practices/clinics that achieve certain percentage proportions of full immunisations. Payments commenced in August 1998 and are made every 3 months. The funds are electronically transferred into practice/clinic accounts and are practice/clinic payments. The payment is \$3.50 per Whole Patient Equivalent (WPE) children for above 90% fully immunised.

Case studies

Below are two examples of how much a practice/clinic could potentially earn with immunisation incentive payments.

Business Case Study 1 – Large Practice

A large General Practice is located in a suburban location with 312 Whole Patient Equivalent children under 7 years of age. The practice has 5 GPs who administer vaccinations to children under 7 years. The practice is registered for the GPII Program. The GPII Feedback Statement for the last quarter indicated that the practice's immunisation coverage rates are at 92.3%.

The practice reported that 16 children completed an age appropriate immunisation schedule and 42 immunisation encounters occurred over the last month.

- (1) How much could the practice earn for the quarter from the quarterly Outcome Payment and ACIR Notification Payment based on the information above?

A – Outcome Payment: $\$3.50 \times 123 = \$1,092.00$

Keep it Simple and Safe!

KISS GUIDE TO VACCINE MANAGEMENT

- (2) How much could the practice potentially earn from the ACIR Notification Payment for the month based on the information above?

A – ACIR Notification Payment: $\$3.00 \times 16 = \48.00

Business Case Study 2 – Solo Practice

A solo GP has a practice in a rural location with 88 Whole Patient Equivalent children under 7 years of age. The practice is registered for the GPII program. The GPII Feedback Statement for the last quarter indicated that the practice's immunisation coverage rates are 86.4%.

The practice reported that 4 children completed an age appropriate immunisation schedule and 12 immunisation encounters occurred over the last month.

- (1) How much could the practice earn from the quarterly Outcome Payment based on the information above?

A – Nil. The practice's coverage rate is less than 90%.

- (2) How much could the individual GP potentially earn from the Service Incentive Payment for the month based on the information above?

A – Service Incentive Payment: $\$18.50 \times 2 \text{ children} = \37.00

- (3) How much could the practice potentially earn from the ACIR Notification Payment for the month based on the information above?

A – ACIR Notification Payment: $\$3.00 \times 4 = \12.00

- (4) If the practice was to increase its coverage rate to above 90%, how much could the practice potentially earn for the quarterly Outcome Payment based on the same information above?

A – Outcome Payment: $\$3.50 \times 88 = \308.00

For further information or assistance, please contact your local Division of General Practice or Population Health Unit. Relevant contact details can be found by visiting www.qdgp.org.au/vaccinemanagement.
